

**Are you getting enough (1)?
Developing an understanding of supervision theories, models
and practice**

Supervision is integral to delivering a quality SLT service. This practical, reflective, one-day course is relevant for SLTs (supervisees and supervisors) from any clinical area. All levels of experience welcome. The course aims to increase participants' knowledge of what supervision is/is not, the forms it can take and RCSLT professional guidance (2017); to consider each participant's supervision history, their preferred style of supervision and to identify their future supervision needs and challenges. This is underpinned by a wide range of theoretical frameworks.

Tutors: **Cathy Sparkes** and **Sam Simpson** www.intandem.co.uk
